

TO: Mary Markley 3rd Floor Residents
DATE: 10/13/2020

Re: COVID-19 Cluster at Mary Markley Residence Hall

The recent pop-up testing event and other testing resulted in identifying an additional 12 positive cases on the 3rd floor of Mary Markley. Due to the previous cases and these cases we are taking additional measures to prevent the spread of COVID-19 within the building. All positive cases and close contacts have been moved or are in the process to be moved to isolation or quarantine.

In alignment with guidance from the Washtenaw County Health Department, the University is taking the following steps:

1. Residents of the 3rd floors **should not attend in-person classes** and are expected to follow [enhanced social distancing for the next 14 days](#):
 - Monitor your health daily by completing the [ResponsiBLUE Symptom Tracker](#). This is a requirement for all individuals on campus daily.
 - Take your temperature two times a day.
 - Stay in your room as much as possible and avoiding contact with others (no social gatherings).
 - Only leave your room when necessary to obtain food, use the bathroom, or in the case of an emergency. Wear a face covering if you must leave your room. Due to increased testing for athletes, they can also leave to attend their athletic events.
 - Maintain 6 feet of social distancing at all times.
 - Wash hands frequently.
2. Even though the remaining individuals have recently tested negative, a person can become infectious 2-14 days past their exposure. It is recommended that students sign up for the Community Sampling and Tracking program at this [link](#) and get additional testing if they desire.
3. Bathrooms on the 3rd floor will have increased cleaning by facilities staff.
4. Anyone that has symptoms or a high risk or known exposure, should contact [University Health Service](#) (UHS) at 734-764-8320 or [complete the online assessment](#) immediately.

We are asking that everyone share in the responsibility to take the precautions as outlined by the Health Department in order to prevent a more serious outbreak that could result in further restrictions. EHS and the Health Department will continue to monitor the case situation closely. We want to reassure everyone that we take your health and safety seriously.

Sincerely,

Danielle Sheen
Executive Director of Environment, Health & Safety

Jimena Loveluck, MSW
Health Officer, Washtenaw County Health Department
