Re: COVID-19 Cluster at Mary Markley Residence Hall

The recent pop-up testing event and other testing resulted in identifying an additional 12 positive cases on the 3rd floor of Mary Markley. Due to the previous cases and these cases we are taking additional measures to prevent the spread of COVID-19 within the building. All positive cases and close contacts have been moved or are in the process to be moved to isolation or quarantine.

In alignment with guidance from the Washtenaw County Health Department, the University is taking the following steps:

1. Mandatory testing of all residents that have not been recently tested. UHS will be reaching out over the next few days to accommodate all residents.
2. Do not visit residents on the 3rd floor as they are expected to follow enhanced social distancing for the next 14 days.
3. Continue to monitor your health daily by completing the ResponsiBLUE Symptom Tracker. This is a requirement for all individuals on campus daily.
4. Limit social interactions within the dorm as well as on campus.
5. Sign up for priority testing to be tested through the Community Sampling and Tracking program at this link. Staff enrolled in program will be invited to test through the program.
6. Anyone that has symptoms or a high risk or known exposure, should contact University Health Service (UHS) at 734-764-8320 or complete the online assessment immediately.

We are asking that everyone share in the responsibility to take the precautions as outlined by the Health Department in order prevent a more serious outbreak that could result in further restrictions on residents. EHS and the Health Department will continue to monitor the case situation closely. We want to reassure everyone that we take your health and safety seriously.

Sincerely,

Danielle Sheen  
Executive Director of Environment, Health & Safety

Jimena Loveluck, MSW  
Health Officer, Washtenaw County Health Department
