Re: COVID-19 Rising Concern for 3rd and 4th floor cases – Testing Recommendation

Based on some small clusters identified on the 3rd floor Hunt House and 4th floor Taylor House, it is recommended that students on these floors prioritize obtaining a test tomorrow at the Michigan Union which will also meet the requirements of the departure testing program. Sign up at this [link](#) this evening as sign up will be extended for this purpose.

Any student that has obtained a positive test within the last 90 days does not need to get tested. No further recommendations or precautions are recommended at this time for these floors other than to follow the normal precautions. All students should practice enhanced social distancing before you intend to travel, ideally for 14 days, if possible and follow the departure guidance found on the [campus blueprint](#).

As always, anyone that has symptoms or a high risk or known exposure, should contact [University Health Service](#) (UHS) at 734-764-8320 or [complete the online assessment](#) immediately.

Sincerely,

Danielle Sheen  
Executive Director of Environment, Health & Safety
