COVID-19 SCENARIOS FOR STUDENTS LIVING IN OFF-CAMPUS HOUSING

Students may shift columns based on scenario developments.

1. I have SYMPTOMS OF COVID-19

   You should isolate and get tested at University Health Service. Follow guidance of UHS, discuss whether your current living environment is suitable for isolation while awaiting test results.

   Yes? Follow CDC guidance on how to protect others in your living environment.

   If your test result is positive, get tested at University Health Service. If you test negative, move to U-M Q&I Housing. If available, move them and their household members to isolation.

   - Quarantine for 10 days from the last day of contact.
   - Optional: get tested at UHS 7-10 days after exposure.
   - Get tested at UHS if symptoms develop.

   Await contact from the Contact Tracing Corps and follow their instructions.

   If your test result is negative, isolate and get tested at University Health Service. If you test positive, move to U-M Q&I Housing. If available, move them and their household members to isolation.

   - Quarantine for 10 days from the last day of contact.
   - Optional: get tested at UHS 7-10 days after exposure.
   - Get tested at UHS if symptoms develop.

   I am worried I have been exposed to someone who has COVID-19.

2. I have a POSITIVE COVID-19 TEST RESULT (within the last 10 days)**.

   You should isolate. Follow guidance of your health care provider and case investigator.

   - If your test result is not from UHS or U-M, report your positive result here.
   - Assess if your living situation is appropriate for isolation.

   Yes? Follow CDC guidance on how to protect others in your living environment.

   If your living environment is not appropriate for isolation, move to an isolated environment.

   - Quarantine for 10 days from the last day of contact.
   - Optional: get tested at UHS 7-10 days after exposure.
   - Get tested at UHS if symptoms develop.

   Wait for contact from the Contact Tracing Corps.

3. I am a CONFIRMED CLOSE CONTACT* of someone who has COVID-19.

   If you are VACCINATED:
   - You do not need to quarantine.
   - Recommended: get tested at UHS 3-5 days after exposure.
   - Wear a mask in public indoor settings for 14 days, or until your test returns negative.
   - Get tested at UHS if symptoms develop.

   If you are UNVACCINATED:
   - Quarantine for 10 days from the last day of contact.
   - Optional: get tested at UHS 7-10 days after exposure.
   - Get tested at UHS if symptoms develop.

   Await contact from the Contact Tracing Corps and follow their instructions.

   If your test result is not from UHS or U-M, report your positive result here.

4. I am worried I have been exposed to someone who has COVID-19.

   Review this definition to see if you are a close contact.

   If no, no further action is required for now.

   Check out self-help tools from CAPS.

   If yes, or you develop symptoms or your close contact* tests positive for COVID-19, get tested at University Health Service.

   - You should isolate.
   - Follow guidance of your health care provider and case investigator.
   - If your test result is not from UHS or U-M, report your positive result here.
   - Assess if your living situation is appropriate for isolation.

   Yes? Follow CDC guidance on how to protect others in your living environment.

   If your living environment is not appropriate for isolation, move to an isolated environment.

   - Quarantine for 10 days from the last day of contact.
   - Optional: get tested at UHS 7-10 days after exposure.
   - Get tested at UHS if symptoms develop.

   Await contact from the Contact Tracing Corps and follow their instructions.

   If your test result is not from UHS or U-M, report your positive result here.

   You are recommended to get tested at University Health Service 3-5 days after exposure.

   - Wear a mask in public indoor settings for 14 days, or until your test returns negative.
   - Get tested at UHS if symptoms develop.

   Students who can do so safely may choose to return to their permanent residence to isolate/quarantine there instead of on campus/Ann Arbor.

   *within 6 feet of a case for a total of 15 minutes or more in 24-hour period as determined by a public health official.

   **For those who are severely ill with COVID-19 infection or those who are severely immunocompromised, an extended duration of isolation for 20 days after symptom onset is recommended.
